

Dear Madam/Sir,

I urge you not to change the Do Not Call for New Jersey residents. Receiving phone calls from businesses is very stressful. We have many important phone calls from relatives, and the business calls interrupt our other urgent communications.

The business calls are also unnecessary and are a terrible invasion into our home when we are trying to rest and eat dinner. No other entity is able to enter our home like these business callers; and they are often rude, persistent, and prying for information and deceptive about who they are and why they are calling. Please do not give them the keys to my telephone!

Thank you,
David Shunk
